EDUCATION

Bachelor of Arts in Computer Science

Minor in Mathematics

Carleton College

📅 June 2026

📍 Northfield, MN

GPA: 3.21/4.00

Posse Foundation Full-Tuition Leadership Scholarship

(2022 – 2026)

TECHNICAL SKILLS

- Python
- Java
- C/C++
- Linux
- Jamf & K1000
- TeamDynamix
- Splunk
- Nessus
- Palo Alto
- LaTeX

ACTIVITIES

- TRIO Student Support Services
2025 – Present
- Focusing on Cultivating Scientists
2022 – Present
- Carleton Office of Intercultural Life
2022 – Present

EXPERIENCE

Assistant Hardware Asset Manager

Carleton College, Information Technology Services

📅 July 2026 – Present 📍 Northfield, MN

- Streamlined computer deployment by utilizing K1000 and Jamf to image and configure endpoints for faculty and staff onboarding.
- Directed IT asset management protocols, meticulously tagging hardware inventory and coordinating e-waste recycling programs.
- Delivered responsive Tier 1 and Tier 2 technical support, managing service workflows and documenting resolutions via TeamDynamix.

Assistant Data Scientist

Carleton College, Academic Technology, DataSquad

📅 September 2024 – June 2026 📍 Northfield, MN

- Assisted in analyzing and interpreting school operations data using Excel to identify trends and support informed decision-making.
- Generated 1–2 detailed reports per term, ensuring clarity and accuracy in data presentation to aid administrative planning and evaluation.
- Maintained data integrity by cleaning and verifying datasets and collaborating with staff to streamline processes and improve strategic discussions.

Information Security Assistant

Carleton College, Information Technology Services

📅 January 2024 – June 2026 📍 Northfield, MN

- Monitored and analyzed security events using Splunk and Nessus, helping identify potential cyber threats and supporting timely incident response.
- Gained hands-on experience with honeypots and Palo Alto firewalls, assisting in testing and improving campus network defenses.
- Created dashboards and visualizations in Splunk to present key security metrics and supported campus-wide cybersecurity awareness initiatives.

Research Intern

Texas Advanced Computing Center

📅 June 2024 – August 2024 📍 Austin, TX

- Investigated decision-making models that integrate human preferences into AI systems, contributing to fairness and interpretability research.
- Applied game theory frameworks to model and analyze strategic interactions between AI agents and study equilibrium behavior.
- Designed and executed simulations to evaluate AI strategies in competitive environments, collecting and visualizing performance data.
